

OMAR AL-MASHHADANI

Full-stack Engineer

📍 Espoo, Finland | 📞 +358 45 132 8500 | ✉️ almashhadaniomar9@gmail.com | 🌐 omar-almashhadani.com | 📄 github.com/omarome | linkedin.com/in/omar-al-mashhadani

PROFILE

A full-stack software engineer with 5 years building production UI with React and TypeScript, most of it translating Figma designs into responsive, accessible interfaces for a large-scale, safety-critical system with multiple user profiles.

Comfortable owning a page or feature end-to-end — from design handoff to component implementation to testing — and used to working directly with designers and product owners to keep a UI consistent as it grows. Also ships full-stack side projects independently, including UI, backend, and hosting. Based in Espoo, Finland.

SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS (responsive, modern layout), Tailwind CSS, Angular, React Query

Craft & Quality: Figma-to-production UI, component-based design, responsive layouts, accessibility-minded markup, unit & E2E testing (Robot Framework, Selenium)

Backend & Platform: Python (FastAPI), Java, REST APIs, SQL, PostgreSQL, AWS, Firebase/GCP, Docker, CI/CD

Tools & Practices: Git, Jira, Bitbucket, Agile/Scrum, OAuth2/JWT

WORK EXPERIENCE

Software Engineer — EKE-Electronics

Feb 2022 – Present

Started as Junior Software Engineer; promoted to Software Engineer

- Build the frontend of a large-scale, safety-critical condition monitoring system in React and TypeScript, implementing pixel-accurate, responsive UI directly from Figma designs across multiple user profiles and complex workflows
- Work closely with UX designers to keep the interface consistent and accessible as the product grows, turning design and product requirements into maintainable, reusable components
- Integrate the frontend with a Python (FastAPI) and Java microservices backend, and support Dockerized cloud deployment and CI/CD workflows
- Write unit and end-to-end tests with Robot Framework and Selenium to keep production releases reliable; collaborate daily with product owners, designers, and backend engineers in an Agile/Scrum setup (Jira, Bitbucket)

Frontend Developer — Academic Exchange Project — Plat4Mation

Autumn 2022 – 2023

One-semester exchange via Amsterdam University of Applied Sciences

- Developed frontend features and UI improvements for web automation tools
- Implemented responsive layouts using React and Tailwind CSS in direct collaboration with designers in Figma

Team Leader — Student Project — Omnia Vocational School

2019 – 2020

Vocational program in Information & Communication Technologies

- Led the "Yetitablet" student project, building frontend and backend features with React.js, Node.js, and MySQL
- Coordinated team workflow and tools using GitHub, Microsoft Teams, and Git

EDUCATION

Bachelor's Degree, Software Engineering — Metropolia University of Applied Sciences

2024

- Specialization in Communication and Information Technologies; Major in Mobile Solutions
- Included a one-semester exchange at Amsterdam University of Applied Sciences (Summer 2022 – 2023)

Vocational Education, ICT — Omnia

2020

- IT Specialist certificate

Bachelor's Degree, Business Administration — University of Baghdad

2013
